Forecast for Thursday 09 Feb 2023

Weather: Wintry showers during the morning, again heaviest and most frequent across western ranges. The showers will turn lighter and less frequent during the afternoon, with snow becoming confined to the higher slopes and summits. Cloudy during the evening with showers giving way to more persistent rain and summit snow.

Chance of cloud-free hill tops above 800m: 20%, locally 40% towards Ben Wyvis.

Low cloud and visibility: Scattered to broken cloud with bases 400-600 metres, lowering to 300 metres at times in the showers. Visibilities generally good, but becoming poor or very poor in the wintry showers with whiteout conditions at times.

Met Office Aberdeen Meteorologist's View
Conditions deteriorating rapidly in the wintry showers.

Forecast for Friday 10 Feb 2023
Weather: Cloudy with outbreaks of rain or drizzle, this mostly light, but turning heavier and more persistent across western ranges for a time during the afternoon and early evening. Drier over the Caithness hills and Ben Wyvis with perhaps some brighter spells.

Maximum wind: West to southwesterly, 40 gust 60 mph, slowly easing 30 gust 40 mph.

Chance of cloud-free hill tops above 800m: 10%, but locally 30% over the Caithness hills and Ben Wyvis.

Low cloud and visibility: Extensive cloud with bases 300-500 metres, locally down to 200 metres around some western coastal ranges, breaking for a time across the Caithness hills and Ben Wyvis with bases lifting 600-800 metres. Poor visibilities at times in rain or drizzle.

Temperature: **Glens:** Plus 4 rising to 10 Celsius
At 800m: Plus 1 rising to 4 Celsius
Freezing level: 900 metres rising above the summits.
